

SMILE MAINTENANCE

WE CONTACT STAIN DAILY - KEEP BRIGHT AT HOME

Have you completed an in-chair whitening session and want to keep your smile bright? Since we consume food and drinks daily, stains can reoccur. Our full retail collection of take-home whitening products will become your routine favorites. Rest assured, our products are made with the cleanest ingredients to ensure your health and smile are well taken care of. Explore our full lineup here. If you haven't tried our in-chair whitening treatments yet, these products can still enhance and maintain your smile's brightness at home!

PRODUCT DETAILS

Made in Canada: Our whitening products are proudly sourced from Fern Whitening Supplies in Ontario, Canada

Professionally Sourced: Fern Whitening Supplies is owned and operated by dental professionals. Our unique and high-quality whitening products are available exclusively through authorized partners. You cannot purchase directly from Fern. Each Fern Partner is trained and align with our commitment to delivering safe, effective, and top-quality chairside and take-home products.

Pure Excellence, No Compromises: Our uniquely formulated whitening line is gluten-free, vegan, kosher, and cruelty-free. Enjoy the benefits of natural ingredients like xylitol and peppermint oil, with the added assurance that our products are fluoride-free, nut-free, and alcohol-free. Please note that while our full product line contains organic ingredients, no whitening product can be "pure plant-based" or "certified organic" due to the nature of the whitening agents used..

Stain X- Exfoliant Paste

Chairside Use: During your bleaching appointment, your provider will use this exfoliant paste to remove surface stains, ensuring a cleaner surface for more effective whitening.

Experience the freshness and clarity that Stain-X brings to your treatment.

Take-Home Use: Loved the clean, fresh feeling from your appointment? Bring that “dental cleaning” freshness home! Use Stain-X once a week or before any at-home whitening treatment to maintain a stain-free smile. This paste is designed for occasional use, not for daily brushing.

Peppermint Whitening Mouthwash

Chairside Use: This refreshing mouthwash is used after your exfoliation brush and at the end of your treatment. Its Xylitol content helps balance pH levels, reducing sensitivity and providing a fresh, safe rinse for your whitening procedure.

Take-Home Use: Keep a bottle on hand to freshen up throughout the day or use it morning and night. It helps maintain brightness, reduce gum inflammation, and supports overall oral health.

Signature Take Home Whitening Pen

Take-Home Use: Keep this pen handy for quick touch-ups throughout the day or use it at home in the morning and night. It helps maintain your brightness and ensures a radiant smile on-the-go. Ideal for adding an extra boost to your whitening regimen and keeping your smile looking its best.

Deluxe Take Home Whitening Kit

Usage Instructions: If you started with a very dark shade on the guide, begin using your take-home kit the day after your chairside whitening session for 5-7 days. Save the remaining product for touch-ups. If using the kit without a chairside treatment, apply continuously for 7-12 days for optimal results.

Refills Available: Refill syringes are available for purchase to keep your smile bright and dazzling.
